

To whom it may concern at the FCC:

Please note that, as a Satellite Radio subscriber, I greatly appreciate the various benefits that the medium provides, including instant traffic, weather, news programming, and the great variety of commercial free music.

I believe it is my right as a PAYING subscriber to receive all these benefits, and do not appreciate any efforts to limit my access to any of these forms of programming.

I urge you to reject the NAB's petition 04-160 and support Satellite Radio providers' ability to provide a full variety of programming.

Respectfully,

Amalavoyal R. Chari
